LIMITATIONS AND EXCLUSIONS OF THE HOME INSPECTION AND REPORT

CLIENT AND COMPANY (Company is also defined to include any and all inspectors who perform the contracted-for inspections as an employee or independent contractor of the Company) agree to the following terms and conditions:

- 1. Client Attendance and Permission to Access Subject Property:** The Client acknowledges that Client and/or any authorized representative has been encouraged to attend and participate in the inspection and recognizes that failure to do so may result in less than a complete understanding of the findings. The Client further acknowledges that such participation is at the Client's own risk. The Client warrants that permission has been secured for the Company to enter and inspect the Subject Property.
- 2. Standards of Practice:** The Company agrees to perform a limited visual inspection of the systems and components included in the inspection as they exist at the time of the inspection and for which a fee has been agreed upon. Home Inspectors, including the Company, are governed by the rules in the New Jersey Administrative Code contained at *N.J.A.C. §13:40-15* and the Company and its inspector(s) shall comply with these rules. Failure to comply with these rules may subject the Company and its inspector(s) to discipline. The inspection is limited by the exceptions and exclusions as contained in the Standards of Practice, *N.J.A.C. §13:40-15.16*, and this Pre-Inspection Agreement.
- 3. Definitions and Purpose of the Inspection:** Home inspection means a limited visual, functional, non-invasive inspection, conducted for a fee or any other consideration, and performed without moving personal property, furniture, equipment, plants, soil, snow, ice or debris, using the mandatory equipment and including the preparation of a home inspection report of the accessible elements of the following systems and components of a residential building: structural; exterior; roofing; plumbing; electrical; heating; cooling; interior; insulation; and ventilation, fireplaces and solid fuel burning appliances, as described more fully in *N.J.A.C. §13:40-15.16(c)*, but excluding recreational facilities and outbuildings other than garages or carports. The purpose of the home inspection is to identify and report on material defects found in those systems and components. A **material defect** is a condition, or functional aspect, of a structural component or system that is readily ascertainable during a home inspection that substantially affects the value, habitability or safety of the dwelling, but does not include decorative, stylistic, cosmetic, or aesthetic aspects of the system, structure or component. **Accessible** means available for visual inspection without requiring the moving of personal property, dismantling, destructive measures, or any action which will likely involve risk to persons or property.
- 4. Inspection Report:** The Client and the Company agree that the Company, and its inspector(s), will prepare a written home inspection report which shall: (A) disclose those systems and components which are/were designated for inspection pursuant to *N.J.A.C. §13:40-15.16* and are/were present in the Subject Property at the time of the inspection, as well as those systems and components which are/were present at the time of the inspection but are/were not inspected and the reason(s) they were not inspected; (B) describe the systems and components as defined in *N.J.A.C. §13:40-15.16*; (C) state and identify what material defects were found in the previously described systems and components; (D) state the significance of the findings; and (E) provide recommendations regarding the need to repair, replace and/or monitor a system and/or component, or obtain examination and analysis by a qualified professional, tradesperson and/or service technician.
- 5. Inspection Exclusions:** The Company **IS NOT REQUIRED TO:** (1) enter any area or perform any procedure which is, in the opinion of the inspector, unsafe and likely to be dangerous to the inspector or other persons; (2) enter any area or perform any procedure which will, in the opinion of the inspector, likely damage the Subject Property or its systems or components; (3) enter any area which does not have at least 24 inches of unobstructed vertical clearance and at least 30 inches of unobstructed horizontal clearance; (4) identify concealed conditions and latent defects; (5) determine life expectancy of any system or component, condition and/or operation of any appliance where connecting piping, wiring and/or components are not readily accessible and visible; (6) determine the cause of any condition or deficiency; (7) determine future conditions that may occur including the failure of systems and components including consequential damage; (8) determine the operating costs of systems or components; (9) determine the suitability of the Subject Property for any specialized use; (10) determine compliance with codes, regulations and/or ordinances; (11) determine market value of the Subject Property or its marketability; (12) determine advisability of purchase of the Subject Property; (13) determine the presence of any potentially hazardous plants, animals or diseases or the presence of any suspected hazardous substances or adverse conditions such as mold, fungus, toxins, carcinogens, noise, and contaminants in soil, water, and air; (14) determine the effectiveness of any system installed or method utilized to control or remove suspected hazardous substances; (15) operate any system or component which is shut down or otherwise inoperable; (16) operate any system or component which does not respond to normal operating controls; (17) operate shut-off valves; (18) determine whether water supply and waste disposal systems are public or private; (19) insert any tool, probe or testing device inside electrical panels; (20) dismantle any electrical device or control other than to remove the covers of main and sub panels; (21) walk on unfloored sections of attics; or (22) light pilot flames or ignite or extinguish fires. The Company **IS NOT RESPONSIBLE FOR DETECTING, IDENTIFYING, DISCLOSING OR REPORTING** the presence of any actual or potential environmental concerns or hazards in the air, water, soil or building materials. Such environmental concerns and hazards include, but are not limited to: asbestos; radon; lead; urea formaldehyde; mold; mildew; fungus; odors; noise; toxic or flammable chemicals; water or air quality; PCBs or other toxins; electromagnetic fields; underground storage tanks; proximity to toxic waste sites or sites being monitored by any state or federal agency; carbon monoxide; the presence of or any hazards associated with the use or placement of Chinese drywall at the Subject Property; or any other environmental or health hazards, unless otherwise agreed to and an additional fee paid.
